

2nd Grade Science Experiment

Final Homework Assignment

May 25, 2022

Dear Parent/ Guardians,

We will end 2nd grade by exploring the magnificent world of science. **Your scientist will be responsible for completing and submitting a project by June 9th.** Each student will present to the class on June 10th, 13th or 14th. Attached you will find experiments to choose from. Please let me know if you have challenges with completing this project or need assistance with gathering materials as soon as possible.

Students can present their findings on a poster board or create an electronic presentation on platforms such as Google Docs, Google Slides (students used this program in class and are familiar with how to use it), Canva, Word, Power Point, etc. If students choose to present in electronic form, please email the final presentation to fadobbins@cps.edu

Project Presentations must include:

- ✓ A Question- What is the question you are trying to answer?
- ✓ A Hypothesis- An educated guess about what the outcome will be?
- ✓ Materials List- What materials will you use to complete the experiment?
- ✓ Procedure- What steps did you take to complete the experiment?
- ✓ Data- Pictures, graphs or charts that explain what took place during the experiment
- ✓ Results- What happened during and or after you completed the experiment?
- ✓ Conclusion- Explain what the results mean to the audience.

Example:
